

To Whom It May Concern
BSE & TSE Statement

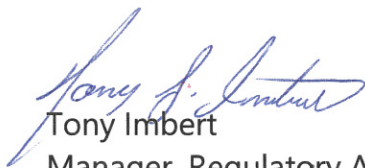

September 13th, 2012

This statement is issued to verify that TriForest PETG bottles are made solely from synthetic plastic polymers.

No materials of animal origin are used in production of the PETG bottles and its caps. They are never in contact with any biological materials at any time during product handling. These products are free from known Bovine Spongiform Encephalopathy (BSE) and Transmittable Spongiform Encephalopathy (TSE) causing agents.

All of the material used and in production or processing is certified to be Animal Derived Component Free (ADCF).

Sincerely,

Tony Imbert

Manager, Regulatory Affairs
